POSTER PREPARATION

Your poster should cover the key points of your work. It should not include all the details of your paper. You can describe these to delegates who are interested in. The ideal poster should attract attention; provide a brief overview of your work; stimulate discussion. Poster can be prepared on ordinary papers, for example A4 or A3. Larger sheets may also be used. You are free to lay out the posters on the board. Please put a title of your paper, names of authors, and affiliations in top of your posters. Please ensure the font size is large enough to enable easy reading from a distance.

You may bring in a laptop or tablet to display videos as a supplement to your poster presentation. However, presenting using only videos without a poster is not permitted.

POSTER ARRANGEMENT

Each booth board will have your presentation number as shown in Fig.1. This number will be put in place by the symposium staffs. This number will be appeared as a presentation number in the final program.

MOUNTING AND REMOVAL OF POSTER

The authors have to mount your poster by 1:20PM (about 30 minutes before the start of the poster session). If you have carefully arranged your posters beforehand, 15 minutes should be ample time to mount your posters. Materials to fix your poster on the board will be provided on site. The authors have to remove all the posters yourself after 3:00PM.
